

Math 8 Lessons for April 21-25

**\*\*If you are absent, you MUST make-up the classwork as well as the homework.**

Monday Apr. 21  2345	<b><u>Agenda: Angle Relationships Project</u></b> <ol style="list-style-type: none"><li>1. Complete the draft of your group city.</li><li>2. Get your draft approved by the teacher (make sure all angle relationships are satisfied).</li><li>3. Once approved, begin working on your final draft of your poster (you only get one poster paper, so sketch it out in pencil).</li><li>4. Streets should be sketched in, along with a few buildings, by the end of the class period.</li></ol>	<b>Due Next Class:</b>  None.
Tuesday Apr. 22  2345	<b><u>Agenda: Angle Relationships Project</u></b> <ol style="list-style-type: none"><li>1. Continue penciling in drawings of buildings and other design elements. Almost all design elements should be added to the poster by the end of the period.</li></ol>	<b>Due Next Class:</b>  None.
Wednesday Apr. 23 2  Thursday Apr. 24 345	<b><u>Agenda: Angle Relationships Project</u></b> <ol style="list-style-type: none"><li>1. Finish penciling in drawings of buildings and other design elements. All design elements should be on the poster by the end of the class period. You should begin to color today.</li></ol>	<b>Due Next Class:</b>  None.
Friday Apr. 25  2345	<b><u>Agenda: Angle Relationships Project</u></b> <ol style="list-style-type: none"><li>1. Color your project. Make it look good and make sure everything is clearly labeled.</li></ol>	<b>Due Next Class:</b>  None.
